

JETVAC INDUSTRIAL

Jetvac Industrial is a steam cleaner with stainless steel body and boiler, designed for industrial use and able to deliver dry saturated steam at 183°C temperature. Equipped with a wet&dry vacuum cleaner with an induction turbine.

A sturdy structure, a fully electric operation and the compact size allows any usage in any environment, both outdoors (watertight protection IPX5) and indoors (production lines).

All functions can be managed on the electronic control panel

Duplex

JETVAC INDUSTRIAL

Three-phase steam generator for usage in the industrial sector, with a stainless-steel body (watertight protection IPX5), **unlimited steam autonomy** thanks to the automatic refilling system with either an internal water tank (electromechanical water level control system inside the boiler – True Temp™) or directly with a water mains connection. **Possibility to inject detergent or hot water together with steam.** The steam generator's front panel is **equipped with an electric console with commands for a timer, a thermometer and a pressure gauge; the digital display will advise the user about the necessity to proceed with the boiler maintenance.** Combined with the three-phase vacuum unit Vac Industrial with a turbine engine of 3kW.

GENERATOR TECHNICAL DATA		
Boiler		Stainless steel AISI 304 with interchangeable heating element
Body		Stainless steel AISI 304 BA
Boiler volume	l	10,8 14,4: 11 - 21,6: 12,5 - 28,8 36: 14
